Majestic Monarch Garden Tray

Monarchs are in decline - want to help?

Create a Royal paradise for the nobels of the butterfly world with a Majestic Monarch Garden.

Simply Native Nursery is offering a complete monarch butterfly garden in a 32-pot tray.

We've taken the guess work out of plant selection by choosing 11 of the best monarch plants for adults and their offspring to complete their lifecycle.

Tray will include Liatris (gayfeathers), various milkweeds, and several other pollen and nectar plants that monarch butterflies will visit over and over.

Gayfeathers are a wonderful source of food for adults to feed upon and milkweeds are vital for successful reproduction. Milkweeds provide food and are host plants for adults to lay their eggs on. After hatching, the larvae eat the leaves of the plant, pupate and emerge as butterflies.

Reserve your **Majestic Monarch Garden Tray** today via email: contactsimplynativenursery@gmail.com or by phone at 309-371-9598.

We also offer **Monarch Milk**, a milkweed tray with up to 3** species of Milkweed plugs (32 total).

Price \$109/tray and includes shipping (sales tax extra)
Price \$99/tray for pick up orders (sales tax extra)

** Customer will select appropriate species to suit their growing conditions - call for details.
